

# Best PC Setup Under ₩1,10,000

## (Graphic Design + Photo Editing Focused)

 Perfect for: Photoshop, Illustrator, Lightroom, light video editing

 **Processor (CPU): AMD Ryzen 5 5600G (with integrated Vega GPU) – ₩15,500**

◆ 6 cores/12 threads, built-in graphics – no separate GPU needed!

 **CPU Cooler: Stock cooler – Free**

◆ Comes in box, enough for design workloads

 **Motherboard: MSI B550M PRO-VDH WiFi – ₩12,000**

◆ Stable, WiFi built-in, M.2 SSD support

 **RAM: Corsair Vengeance 16GB (2x8GB) DDR4 3200MHz – ₩6,500**

◆ Smooth performance in Adobe CC

 **SSD (Main Drive): Western Digital SN570 1TB NVMe SSD – ₩8,500**

◆ Fast load/save, 1TB enough for work & OS

 **HDD (Optional for storage): Toshiba P300 1TB 7200RPM – ₩4,000**

◆ Extra space for RAWs, backups, etc.

 **Power Supply (PSU): Antec Atom B550 550W 80+ Bronze – ₩3,800**

◆ Reliable power, enough for APU build

 **Casing: Value-top VT-B701 RGB ATX Case – ₩3,000**

◆ Comes with fans, good enough airflow

 **Monitor (Main Design Display): LG 24MP400 IPS 24" Full HD – ₩17,000**

◆ IPS = accurate colors, essential for design

 **Keyboard + Mouse Combo: Logitech MK120 Wired Combo – ₩1,200**

◆ Basic but solid and reliable

 **Headphone (Optional): Havit H2232D – ₩1,200**

◆ For basic audio work & client meetings

 **Total Estimated Price: ~₩1,09,700**

 **Why This Setup Works:**

- **Ryzen 5600G** = Great CPU + built-in GPU = no need to buy extra graphics card
- **16GB RAM + 1TB SSD** = Fast performance for Adobe Suite
- **IPS Monitor** = Crucial for color-accurate designs
- Future upgrade path: Add GPU (like GTX 1660/RTX 3050) later if needed
